BOOK OF ABSTRACTS

Marte S. Gulliksen and Kirstine Riis (eds.)

MAKING
AN INTERNATIONAL CONFERENCE ON MATERIALITY AND KNOWLEDGE

Notoddøden, Norway
24.-27. September 2012
Organizer
The conference is organized by the Nordic research network, NordFo. NordFo is the Nordic Forum for research and development in Craft and Design. Web site: http://nordfo.org

Host and organizer
Telemark University College (TUC), Department of Art and Design Education, Faculty of Arts, Folk Culture and Teacher Education, is hosting and organizing the conference. http://hit.no, http://hit.no/eng

Scientific committee
The scientific committee is the Presidium of NordFo, represented by:

- Associate Professor, PhD, Marte S. Gulliksen, Telemark University College, Norway (Leader of the committee and deputy president in NordFo)
- Professor, PhD, Marlene Johansson, Göteborg University, Sweden and Åbo Akademi, Vasa, Finland, Telemark University College, Norway
- Associate Professor, PhD, Mia Porko-Hudd, Åbo Akademi, Vasa, Finland
- Associate Professor, Bente Ytterstad, Oslo University College, Norway
- Research Fellow Eva Lutnaes, Oslo University College, Norway

The organizing committee
The organizing committee consists of the Scientific committee, supported by:

- Research Fellow Kirstine Riis, Telemark University College, Norway (practical coordinator)
- Professor, PhD, Liv Merete Nielsen, Oslo University College, Norway (representative for the main co-operating institution)
- Head of department Jostein Sandven, Telemark University College, Norway (Leader at the conference venue)
- Senior Executive Officer, Carl-Magnus Nystad, Telemark University College, Norway (in the venue administration)
- Executive Officer, Tonje Brokke, Telemark University College, Norway (in the venue administration)
The Making Conference

Making – an International Conference on Materiality and Knowledge in Notodden 24th-27th September 2012 – aims to provide an arena for discussions on field-specific, inter- and transdisciplinary knowledge production within Making Disciplines/Making Professions/Making Education.

The active and creative meaning of the word Making is the first key-concept of the conference and the centre of focus. The making of something in something, a material, renders a focus on the physical and material aspects of making. Materiality is as such the second key-concept of the conference. The third key-concept of the conference, knowledge, emphasizes the need to understand Making as both a knowledge-based and a knowledge-generating process.

The conference takes an educational perspective on these key concepts. Questions asked, are:

- How can education in the Making Professions prepare the future citizens for identifying and solving possible future challenges?
- What are the possible meanings, functions and consequences of materiality and material-related knowledge in such a context?

The conference acknowledges the multiplicity of meanings around the Making Professions. Critical and constructive exchange of ideas and debate will be welcomed. Therefore, in addition to the key-note speeches, time is provided for two larger panel discussions, and for prepared peer-response on presented papers.

Invited papers

When we called for papers we welcomed papers related to the Conference's three key-concepts: Making, Materiality and Knowledge. We encouraged paper presentations to be more than simply lectures and have welcomed sessions that incorporate other and more active/making forms for presentation.

At the deadline for submission 145 abstracts were registered. The abstracts were then evaluated by a select team of peer-reviewers in April/May 2012. Confirmation of acceptance was followed by a publication of the abstract on the conference website. We are here proud to present the abstract of the 109 papers to be presented at the conference.

Since we have invited both traditional academic papers and papers with emphasis on a more multimodal presentation we have chosen not to have a template for the papers presented at the conference. The abstracts show this complexity and are discussing a broad spectrum of relevant aspects within the framework of MAKING.
Categories of presentation

At the time of submitting the abstract, the author marked which category the paper was to be considered for.

1. Papers with peer-response: Papers in this category will be given 20 minutes for a presentation, 10 minutes for a prepared response/discussion from a peer, and 10 minutes discussion with audience. Authors who wanted their paper considered for this category, sent full papers to their peer by 1. September 2012, in order for the peer to prepare a response.

2. Paper without peer-response: papers in this category will be given 15 minutes for a presentation and 10 minutes for a discussion with audience.

The peer-response system at the MAKING-conference is an orally presented, constructive critical reading of the paper, given by a peer. The format may be response or a prepared discussion. It is emphasized that the peer-response should be exactly that: a response, not a review. The Peer-response system is set up in order for presenters to get a more prepared response on their presentations, for peers to have more time to think about a contribution before discussing it in public, and for the audience to get more insight in the presentation before raising their own questions or comments.

Post conference publication

The conference has a partnership with the scientific journals Studies in Material Thinking, Techne A and FORMakademisk. All three journals will publish a special issue with articles based on papers and keynote lectures presented at the Conference. Together, the three journal issues and this Book of abstracts form the official publications from the Making Conference.

Notodden, Norway, 16. September 2012

Marte S. Gulliksen & Kirstine Riis (Editors)
ABSTRACTS TO PAPERS PRESENTED AT MAKING, AN INTERNATIONAL CONFERENCE ON MATERIALITY AND KNOWLEDGE, NOTODDEN 24TH TO 27TH SEPTEMBER

Session 1 With peer-response

ALLISON SCHRIMACHER ................................................................. 7
Crafting Authenticity .................................................................. 8

JENNY FROHAGEN ................................................................. 9
The knowing of symbolic expressions in artefacts a Learning study of a subject content in Swedish Sloyd education ........... 9

ANDRY KIKKUL ................................................................. 10
Nordic craft teachers vision of possibilities for using science knowledge in craft education ............................................... 10

CATHERINE DISHE HONDEZEL, RON HANSEN; .............................................. 11
Learning Environments, Culture and Community: Exploring the Precursors of Human Innovation ............................... 11

BIC TIEH ................................................................. 12
Making the Sprinkling of a Magical History: Making in the new world ............................................................... 12

LEONG K. CHAN ................................................................. 13
Imitation, materiality and the making of pleasurable things during Ming and Qing China .................................................. 13

CAMILLA GROTH, MAARET MAKELA .................................................. 14
Making Sense - What can we learn from experts of tactile knowledge? ........................................................... 14

TODD ROBINSON ................................................................. 15
BODILY KNOWING: THE DEVELOPMENT OF A METHOD TO ARTICULATE THE NON-VERBAL DIMENSION OF CREATIVE PRACTICE ................................................................. 15

EVA LUTNES ........................................................................ 17
Regimes of competence in the subject Art and Crafts ............................................................... 17

GEORGINA PALMER, GEORGE TORRENS, DAVID SCOTT ............................................. 18
Pot throwing: Can an ancient experiential experience be evaluated? A study assessing experiential and tacit knowledge ........ 18

LISA GRÖCCOTT ..................................................................... 19
Beyond the post-it note: making in the context of design thinking ............................................................. 19

TERRY ROSENBERG, DUNCAN FAIRFAX .................................................. 20
The Speculative Practitioner: or, the way innovative thinking matters ........................................................... 20

SINIKKA PÖLÄNEN ................................................................. 21
Empowerment through craft: Craft makers descriptions of their crafting .......................................................... 21

SISSEL BACHSEN ................................................................. 22
Miss Sissels sense of silk .................................................................. 22

JOHN SADAR ................................................................. 23
Inhabiting Materials, Managing Environments ............................................................... 23

TORE GULDEN, ARILD BERG ................................................................. 24
Making long lasting products by activating people ............................................................... 24

Session 2 Without peer-response

ANDREA PEACH ................................................................. 25
Crafting a Revival? The Persistence of Making ............................................................... 25

AWONIYI STEPHEN ..................................................................... 26
Drift as Innovativeness Cost .................................................................. 27

CATHERINE HANSEN ................................................................. 29
The dual language of Materiality in contemporary art ............................................................... 29

ERIK SIGURDSON ................................................................. 30
Making Masculinity - The socio-material structure of masculine places inn the wood- and metal workshop ............................................................... 30

EVA VEEBER, ERJA SYRÄLÄNEN, ENE LIND .................................................. 31
Discussions on the Impact of Craft Education on Children and Adolescents .......................................................... 31

HANNE SCHNEIDER, METTE JØRGENSEN STIG PEDERSEN ............................................. 32
Craft and design a new subject in the school curriculum, a new teaching practice .......................................................... 32

JANE STODDARD ................................................................. 34
The Composition of a Hat .................................................................. 34

JANNE ELO ................................................................. 35
Entrepreneurship education in sloyd .................................................................. 35

KAREN BÆRNE, LIV MERETE NIELSEN ................................................................. 36
Design Literacy - knowledge and meaning in context .................................................................. 36

KARIN LANDÅHL ................................................................. 38
Form is making exploring the relation between form and material in knitwear .................................................................. 38
KERRY WALTON .......................... 39
Weaving as Drawing: unpicking the relationship between textiles process and drawing .................................................. 39
LAILA BELINDA FAUSKE .................................................. 40
Qualifying for public discussion through the school subject Art and Crafts ............................................................... 40
LISA MEANEY .......................................................... 41
Posthumanist Design .......................................................... 41
MILLA OJALA .................................................. 42
Constructing Knowledge in the Process of Craft-art in the Context of the Basic Crafts Education of Young People ...................... 42
MINNA KAAPAINEN .................................................. 43
Garment making and ICT student’s perspectives about Advanced Clothing Studies - course .................................................. 43
OUTI SIPIÄ .......................................................... 44
Making aprons making conception of order, cleanliness and purity ............................................................... 44
SVERRE STOKKE .................................................. 45
Traces in metal.......................................................... 45
GREG PIPER .................................................. 46
The Invisible and Visible in Making. Reflection on personal practice ............................................................... 46
VERENA ZIEGLER .................................................. 47
Integrative Capacity through Making .......................................................... 47
ANTTI HELMOLA, ERJA SYRJÄLÄINEN .................................................. 48
Weighing the curriculum of crafts. Teachers opinions after eight years of experience .................................................. 48
ESKO MAKELÄ .................................................. 49
Making Material Narrative towards an aesthetic understanding of educational sloyd ............................................................... 49
Session 3 With peer-response .......................................................... 50
ANNELIE HOLMBERG .................................................. 51
Masters and apprentices of textile craft .......................................................... 51
KEITH RUSSELL .................................................. 52
On Making the Affects of Things .......................................................... 52
KAREL DECKERS .................................................. 53
Existential anguish inside architecture: the interior –disquieting yet familiar– in between encounter and belonging .......................................................... 53
TERO HEIKKINEN .................................................. 54
Design diary of a wooden bike: Putting the practice-led learning to conscious use ............................................................... 54
KRISTINE THRANE .................................................. 55
Social Structures as Materiality and Form .......................................................... 55
MICHAEL DICKINSON .................................................. 56
More than writing: How making reflects the design of knowledge. Or how making without knowledge creation can win the battle but lose the war .......................................................... 56
MARIANA SALGADO, MIRJA AHVENAINEN .................................................. 57
What and Where? / A Visual Synthesis of Service Design Methods and the Phases for Implementing them .......................................................... 57
MELONIE BAY-SMITH .................................................. 58
The Build/Utility research project .......................................................... 58
RACHEL PHILPOTT .................................................. 60
Engineering opportunities for innovation: the importance of playful making as developmental method in practice-led design research .......................................................... 60
ÅSTA RIMSTAD .................................................. 61
Communication and Meaning-making through Artefacts. A study of students working processes with installations .......................................................... 61
MIKA METSARINNE, MANNE KALIO & KALLE VIRTA .................................................. 62
Pupils sloyd learning culture due to the national evaluation results in Finland ............................................................... 62
ARILD BERG, TORE GULDEN .................................................. 63
Material expressions of intentionality .......................................................... 63
CATHERINE DESHKE HONDZEL, MARTE SOREBO GULIKA .................................................. 64
The environment for ingenuity: An examination of creativity in Canada and Norway using the Torrance Test of Creative Thinking .......................................................... 64
NITHIRUK NIMKULRAT .................................................. 65
Situating Creative Artefacts in Art and Design Research .......................................................... 65
Session 4 With peer-response .......................................................... 66
Bolette Kremmer Hansen, Inger Lokjær Faursdal .......................................................... 67
The Inclusive School and aesthetic learning .......................................................... 67
CARLOS CASMIRO DA COSTA, JACINTA CASMIRO DA COSTA .................................................. 68
Absolute beginner .......................................................... 68
ELISABETH J. HEIMDAL ................................................................. 69
Exploring Textiles in Architecture through Tangible Three Dimensional Sketching Tools ................................................................. 69
SABINE PAGAN ........................................................................... 70
A cross-disciplinary approach to crafting materiality, place and memory ...................................................................................... 70
FAITH KANE, RACHEL PHILPOTT ........................................... 71
Textile Thinking for Sustainable Materials ........................................ 71
FRANCES JOSEPH ....................................................................... 72
Collaborative Making: The development of e-textiles for dance costumes ................................................................................ 72
KARI CARLSEN ........................................................................... 73
Materiality in small children’s early learning in a kindergarten context ...................................................................................... 73
SEIJA KARPINEN ........................................................................... 74
Primary student teachers emotional experiences in craft in the light of Hannah Arendts’s human conditions ........ 74
KRISTA KOSONEN ........................................................................ 75
Visualizing significant experiences in material form ................................ 75
LIONEL DEAN, DR ERITU UNVER ........................................... 76
Making it real: virtual tools in 3D creative practice ........................................ 76
MEI-WEN WANG-GILGES, PROF. BRUCE MONTGOMERY ......................... 77
The Process of Fashion Design and Garment Construction as a Practice Initiated in Three Dimensions - Are we teaching our designers as much as we could? ........................................................................ 77
STINA WESTERLUND ..................................................................... 78
Pleasure and Displeasure in Relation to Textile Work ................................ 78
TARJA-KAARINA LAAMANEN .................................................. 79
The role of material experimenting in textile craft design ideation .... 79
VIVIKA BERGGREN TORELL, ULLA RANGLIN ................................. 80
Knowledge in action in weaving ........................................................ 80

Sessjon 5 With peer-response .......................................................... 81
ALEXANDRA GRIFFITH WINTON .................................................. 82
A Series of Relationships: Materials, Making and Mass Production in Mid-Century America ...................................................... 82
BILJANA C. FREDRIKSEN ............................................................ 83
Negotiating Grasp: Negotiating meanings through material explorations ...................................................................................... 83
MIRKEL TIN .................................................................................. 84
To have a body and to be one’s body .................................................... 84
ANDREW WELCH ........................................................................... 85
The ghost of the ethical object ............................................................ 85
CINDY KOHTALA ......................................................................... 86
The environmental sustainability of distributed material production: a literature review ...................................................... 86
MARIE KOCH ................................................................................. 87
Doing Craftivism ............................................................................. 87
EILA LINDFORS ............................................................................. 88
A moving toy: Pupils as makers and innovators ..................................... 88
INGUINN SOLBERG ................................................................. 89
Land Art in Preschools. An art practice .............................................. 89
STEPHANIE FREEMAN .................................................................. 90
Tangible DIY: Motivational Patterns and Social Meeting Points .......... 90
JAN BOWMAN ............................................................................... 91
Mapping thoughts in Making .............................................................. 91
JANET MCGAW .............................................................................. 92
Possum Skin Cloak: a mapping of country ........................................... 92
KALLE VIRTAA, MIKA METSÄRINNE & MANNE KALLIO ................. 93
ILLUSTRATED SLOYD PROCESS IN EARLY EDUCATION EXPERIENCES AND BENEFITS ................................................................. 93
KATHLEEN SCHMALZ ..................................................................... 94
Exploring the roots of creativity – decoding the results of Torrence testing in Canada and Norway .................................................. 94
MITZI VERNON, AKSHAY SHARMA, MARTHA SULLIVAN ...................... 96
Form Studio: Generating a Language and Making Form ...................... 96
ZOE JAY VENESS ........................................................................... 97
Holding time: an analysis of jewellery making ..................................... 97

Sessjon 5 Without peer-response ..................................................... 98
BENT IILIM & MARLÈNE JOHANSSON ......................................... 99
Transforming materials into physical artefacts learning in the school’s practice of Sloyd ................................................................. 99
FINN HJARDEMAAL, HJORDIS HJURE, ................................................................. 100
Online Master’s degree in Arts and Crafts opportunities and challenges ................................................................. 100

ABSTRACTS TO PAPERS PRESENTED AT

MAKING, AN INTERNATIONAL CONFERENCE ON MATERIALITY AND KNOWLEDGE, NOTODDEN 24\textsuperscript{TH} TO 27\textsuperscript{TH} SEPTEMBER.
Tomorrow, I m recovering my Thursday child as an absolute beginner,
Transporting you to the essential touch of surface skin and space,
Only for you, i do not regret, looking for education in a materia set.

My love is your love, my materiality is you making things,
The legacy of our ethnography, craftsmen s old and disappear, make me strong hard feelings,
Recovering experiences and knowledge sprinkled in powder of stone, wood and metal ( ) reflecting in
your dirty face the tranquility of your serendipity.

Transport me to sensitive springs, most of the People run to mars like Major Tom,
they only have heroes that comes from the virtual tomb,
but Absolute beginners still deal with dust to dust, and ashes to ashes,
Looking again to Thursday s child and...

essential, exalted, noble and creative, knowing Materia is our path,
our sense of a possible future not far from faith,
We do need Enablers like you, that bring us the experience from old men s path s,
Showing us the way that blow s in the wind

Well my love, timeless Enablers regard project design po(etic) attitude,
hope to infecting us, even further with tools to talk about hopping then to say,
that we (..) could be Heroes, just for one day.

This design aim rhapsody, pretend us to transport not only to the tangible music of Bowie, but to the
essential spectrum that, we as teachers look for, when we pretend to pass our intentions and knowledge
(John Dewey, 2004). The economic, environmental and social crises give us a strong minded support
that we have to pass to our children and students. A sense that materia and the way we work on it can
establishes profound bounds in the artifacts that fulfill our habitus.

Also, our research refocus in that particular intrinsic structure of creating a legacy spectrum of crafted
people skills from popular craft/design (Morris, 1881, Gropius, 1919; Papanek, 1971, 1995; Bonsiepe,
1998; Bozzi & Oroza, 2003), which still have the time to pass their knowledge to younger generations.
A particular joy in labour, that comes from Morris times, recovering ethnographic and anthropological
wisdoms, older tools and the way of tooling, proposing experience and connecting old/new language
and technologies.

The project design research tries to find in this new ecology of transference (Manzini, 2006) of teaching
and the paradigmatic old technics (craft and popular design), humbled producers/enablers that will
perpetuate the pass (and present), proposing a future of knowledge exchange. A sense of global tools
(Mari, 1997), connected locally and globally but that will give logic not only to immateriality knowledge
but also to the awakening of new curios making minds.

David Bowie: Space Oddity, 1969; Heroes, 1977; Ashes to Ashes, 1980; Thursday s Child, 1999
CONFIRMED EXHIBITIONS AND WORKSHOPS

ANNEKE VAN DER FEHR, FINN HJARDEMAAL, PRIKKEN VINDING: OH LORD JESUS, MAY FORCE AND STRENGTH FLOW UPON ME. A CRUDE INTERPRETATION OF FEYERABEND

JADWIGA PODOWSKA: THE SCIENCE OF CONFUSION

STUART FROST: THE MYSTERY OF NATURAL OBJECTS

ASTRID HUS/STUDENTS: IN DIALOGUE WITH TEXTILE MATERIALS

ELLA MELBYE: BIRCH IN MY LIFEWORLD - METAMORPHOSIS

MITZI VERNON, AKSHAY SHARMA, MARTHA SULLIVAN: FORM STUDIO

KATHLEEN SCHMALZ: EXPLORING THE ROOTS OF CREATIVITY

JANET BOWMAN: MAPPING THOUGHTS IN MAKING

OTHER TEACHERS/ARTISTS FROM TUC

STUDENTS FROM TUC

MAKING BLOOMERY IRON - WORKSHOP
