Braga, Portugal

This is a digital edition.
Welcome to CARN 2015

On behalf of the Organising Committee, it is my pleasure to welcome you to the annual conference of the Collaborative Action Research Network (CARN) 2015!

The theme of the conference *Action Research Across Disciplinary Settings: Challenges for change and empowerment* will enable the discussion and celebration of our diverse topics, roles and professional contexts. We wish to include the different voices and understandings in Action Research taking a multidimensional and multi-perspective approach. There will be many opportunities for interaction and discussion throughout the conference. Also, take the opportunity to explore the city of Braga and its surroundings.

We look forward to welcoming you in Braga and sharing ideas and experiences with professionals from around the world.

Maria Assunção Flores
Chair of the Organising Committee
# Table of Contents

Welcome to CARN 2015........................................................................................................... 3
Table of Contents ..................................................................................................................... 4
International Advisory Board ................................................................................................. 9
Invited Speakers ....................................................................................................................... 10
Programme Overview ............................................................................................................. 11
Workshops - Parallel Sessions 1 ............................................................................................ 12
  Can Action Research save national healthcare organisations such as the NHS? ............ 12
  SSM Workshop Part-1 by using Rich Picture; Discussing “actual feeling of situation” based on Soft Systems Methodology in Japanese mode ................................................................. 13
  Developing an International Module to support ERASMUS Incomings & future Outgoings: Grassroots European Co-operations .................................................................................. 14
  Action Researchers: A Force for Positive Change ............................................................. 15
  Getting published in the CARN Bulletin and in Educational Action Research (EARJ) ........ 16
Symposia – Parallel Sessions 2 ................................................................................................ 17
  Community engagement and education for promoting social change – possibilities and challenges. Experiences from the Uluguru mountains in Morogoro, Tanzania ...................... 17
  Theory and Practice of the Accomodological Action Research developed based on Japanese context ................................................................................................................................. 18
  Action Research in School Counseling ............................................................................. 19
Seminars – Parallel Sessions 2 ............................................................................................... 22
  Researching sustainability and scale-up of professional development programmes’ impacts 22
  Pedagogical and didactical common denominators for relevant vocational education and professions education .................................................................................................................. 23
  Developing linguistic competence and methodology awareness through action research.... 24
  On the critical role of public communication practices in action research processes: Voices from a teacher education context ................................................................................................. 25
  Networking for Education for Sustainable Development in Austria: A case study .......... 26
  Lesson Study – a method for improving teaching and collaborative learning in Norwegian elementary schools .................................................................................................................. 27
  Participatory Evaluation for Health Promotion and Prevention on Adolescent Mental Health – a Co-Construction of Knowledge between Research and Practice ........................................... 28
  Participatory research with children: some features about the Portuguese contribution ..... 29
Workshops - Parallel Sessions 3 ............................................................................................ 30
  How can we as a teacher education contribute to a Pedagogy for sustainable development? ........................................................................................................................................ 30
  SSM Workshop Part-2 by using Rich Picture; Making significance to the discussion of SSM Workshop Part-1 by reflecting and co-owning awareness in it ....................................................... 31
  Promoting Change through action research in adverse conditions: a social dreaming matrix 32
Interdisciplinarity in care production in the health context .......................................................... 33
Neoliberalism and Action Research .................................................................................................. 34

Seminars – Parallel Sessions 4 ......................................................................................................... 35
School doctor care in Austria as a from socioeconomic state independent medical care for children and teenager .......................................................... 35
Action Research in medical education over 20yrs ......................................................................... 36
Proqualis: a participatory work and research project with people with learning disabilities .... 37
Reflecting professional work in case studies – a cross case analysis ............................................. 38
Creating inclusive learning environments through dialogue: a case study outlining the use of autistic students’ critical autobiographical narratives in informing academic .......................................................... 39
Changing teaching beliefs and practices with collaborative action research .............................. 40
The Change Room promotes teachers’ agency to change their practice ........................................ 41
Practical tasks in theoretical teaching in lower secondary school ............................................... 42
Implementing Participatory Action Research Methodology in Developing Schools as Sustainable Cultures of Learning Organizations ........................................................................... 43
"We are many" – Recognition and highlighting of the skills of young mothers in the scope of (international) social sciences ........................................................................................................ 44
Learning to Cooperate. An Action Research in Early Childhood Education in Spain .................. 45
Dialogue with Fishermen about Skin Cancer from the Perspective of Popular Education in Health .......................................................................................................................... 46
Participatory research in health: A documentary analysis ............................................................ 47
“Who trains trainers? Trained mentors ease entrance of new teachers, avert their drop out and significantly contribute to their own work place .......................................................... 48
Teacher as researcher: the ethic engagement in action research .................................................... 49
Emancipatory action research: seeking a critical living praxis ....................................................... 50

Symposium – Parallel Sessions 5 .................................................................................................... 51
Developing teacher professionalism through teacher leadership ................................................. 51

Seminars – Parallel Sessions 5 ......................................................................................................... 53
Accompanying innovation in schools through an inter-university action research project ...... 53
Teacher writing in a research-formation project -The role of the writing habit in the professional performance and development of 1st grade Teachers in a research-formation integrated project .......................................................... 54
Action research and teacher training: the use of research in the classroom for the transformation of reality ...................................................................................................................... 55
Snakes and Ladders: Conducting Action Research in Contemporary Healthcare Practice ... 56
Improving Science Teaching In Inclusion Classrooms: An action Research Study .................... 57
Transformative action research – orphans from victims to agents for change ................................. 59
Promoting Social Justice, Student Success and Professional Development Through Action Research .......................................................................................................................... 60
The multi-paradigmatic nature of action research: a blessing or a menace? ............................... 61
Challenging government policy on English language teaching in Japan from bottom-up through collaborative action research .............................................................................. 62
Appreciative Inquiry as an intervention to change nursing practise focusing on in-patient settings: a systematic review........................................................................................................... 63
Creative curriculum change through collaboration: early career teachers’ action research on arts and cultural activity............................................................................................................ 64
Classroom Action Research in Thai Context: Challenges and Solutions .............................................. 65
Participatory action research with carers of young children in Botswana ............................................. 66
Participatory Research in health professionals training: does it have a positive impact? ...... 67
Comprehensive external evaluation using a collaborative research-action methodology ...... 68

Symposium – Parallel Sessions 6 ................................................................. 69
Employability and The Study Of Education: Widening Notions, Challenging the Agenda And New Identities ........................................................................................................... 69

Seminars – Parallel Sessions 6...................................................................... 71
A German campaign against poverty: Evaluation of Community Work as a Learning Process .......................................................................................................................... 71
Networking for Sustainability: Challenges and Opportunities from Sparkling Science ............... 72
Walking side by side down quality street: participatory approaches to reflexivity ......................... 73
Action Research in the Americas: Update on The Work of ARNA .................................................. 74
Building a Community of Inquiry at a National Level? Challenges Faced by PartKommPlus – German Research Consortium for Healthy Communities ................................................. 75
Accentuating the positive: Action Research and promoting change in adversity ......................... 76
Action research as a tool for internal program evaluation in education ............................................ 77
Voicing in Collaboration............................................................................................. 78
Positioning in teacher collaboration: Further questions ............................................................. 79
The Loneliness of the Long-distance Lecturer: Phase two of research on ‘Critical pedagogy and Critical Learners’ ............................................................................................. 80
Early childhood conflict mediation through collaborative action research ........................................ 81
Language building in participatory action research ....................................................................... 82
Person-centred relationships, a means to and/or outcome of action research? ................................. 83
The role of action-research in the field of ethical teachers’ training ............................................... 84
The action research on praxeological transformation ..................................................................... 85

Posters Display and Presentation .......................................................................... 86
Co-Researcher, Participant or Human Guinea Pig? Critical issues in Action Research with physicians, nutritionists and social scientists .......................................................... 86
Training subject-teachers in Austria to meet new challenges within current contexts for Content & Language Integrated Learning ........................................................................ 87
Service user involvement in adult mental health settings: Reflections on taking an action research approach ................................................................................................................ 88
Searching for and problematizing the emancipatory elements in nursing higher education... 89
Co-teaching with medium arrangements in the inclusive classroom for children with linguistic challenges ................................................................. 90

Building possibilities in a preceptor health program: workshop of experience exchange ...... 91

Developing and Implementing Authentic Inquiry Learning Environments in School Science meets Action research........................................................................ 92

The OBAMA Project: Researching how to help vocational trainee-teachers to improve their teaching of Maths in their subject areas ........................................................................... 93

The potential of action research for teacher and school development in challenging times: a practitioner perspective .................................................. 94

Seminars – Parallel Sessions 7 ........................................................................................................ 96

Pesquisa-ação colaborativo-critica e práticas pedagógicas: possibilidades e tensões para pensarmos os processos inclusivos ........................................... 96

O cuidado pessoal da pessoa com doença crônica: repercussão de uma pesquisa-ação .... 97

Investigação colaborativa na formação continuada de professores de educação especial ... 98

Applicability of the Action Research: Adjustments and adaptations to Freire's Liberating Education .............................................................................. 99

Sustaining the Bilingual Education Policy Effectively at School Level ......................... 101

Developing an action research approach to knowledge creation for nursing ............... 102

Introducing a New Resource: The Palgrave International Handbook of Action Research ... 103

Insights from a participatory project with students in a higher education institution ........ 104

Challenges in the field: using participatory action research in rural schools in South Africa 105

Supervising graduation theses based on action research programs: a perspective on the professional development of student teachers ............................................. 106

Building transformative citizenship through research ......................................................... 107

Teacher Education, Reflexivity and Cultural Diversity – The Potentialities of Collaborative Action Research ....................................................................... 108

Developing interdependent multilingual literacies from own sites: A reflective tale of two South African early literacy teachers ................................................. 109

The Reciprocal Encounters and Security in Child Welfare .............................................. 110

Pedagogical Action Research: Collaborative practices of empowerment and participation 111

The Role of Feedback in Learning School Organizations Cultures That Implement Participatory Action Research .............................................................. 112

Symposium – Parallel Sessions 7 .............................................................................................. 113

Action Research for Social Justice: Empowering Voices Through Collaborative Educational Practices .......................................................................... 113

Seminars – Parallel Sessions 8 .................................................................................................. 117

Content analysis of educational action research coordinated by Teacher Center, Nikaweratyi, Sri Lanka ............................................................................ 117

Relevant and meaningful practices and teaching in vocational teacher education .......... 118

Insider, Outsider or emergent and socially constructed positionalities? The role of action researchers in communities and organisations ......................... 119

Trust in action research ........................................................................................................... 120
Public Health in Rural Cambodia: An Exploration of Volunteer Community Health Workers (VCHW) using Photovoice Techniques ................................................................. 121

BUSLAR – Citizen Self-Organisation between service and participation. Action Research in rural areas in Germany ........................................................................................................ 122

Comparative analysis of the research methods: Action Research and Design Science Research ................................................................................................................................. 123

Collaborative, reflective, classroom inquiry: an action research study ................................ 124

Pesquisa-ação: formação docente e educar na diferença ..................................................... 125

Pesquisa-ação aplicada no aprimoramento das ações de prevenção às DST e HIV na Atenção Primária em Saúde ........................................................................................................ 126

A adesão ao tratamento não medicamentoso de hipertensos e percepção de saúde: contribuições para educação em saúde .................................................................................. 128

Oficina para elaboração do instrumento da pesquisa-ação que investiga a prevenção ao HIV/aids na Atenção Primária em Saúde ........................................................................ 129

Workshops – Parallel Sessions 8 ......................................................................................... 130

Educational technology for the empowering persons with chronic health conditions .......... 130

Pesquisa-ação: Desafios e direções futuras na criação de uma CARN em Língua Portuguesa (Session in Portuguese) ...................................................................................................... 131

Symposium – Parallel Sessions 8 ......................................................................................... 132

Relevant curriculum development in vocational education and training (VET). A project combining action research and conventional research approaches ...................................... 132

List of Participants .................................................................................................................... 135
International Advisory Board

Ana Margarida Veiga Simão, University of Lisbon, Portugal
Andy Convery, University of Sunderland, United Kingdom
Franz Rauch, Alpen-Adria-University, Austria
Jacqueline van Swet, Fontys University of Applied Sciences, Netherlands
Jane Springett, University of Alberta, Canada
Joseph M. Shosh, Moravian College, USA
Karen Mcardle, University of Aberdeen, United Kingdom
Lonnie Rowell, University of San Diego, USA
Maria Assunção Flores, University of Minho, Portugal
Mary Koutselini, University of Cyprus, Cyprus
Michael A. Buhagiar, University of Malta, Malta
Michael T. Wright, Catholic University of Applied Sciences, Berlin, Germany
Rinaldo Molina, Mackenzie Presbyterian University, Brazil
Sigrid Gjøtterud, Norwegian University of Life Sciences, Norway

This work describes an experience developed with 23 students of an Informatics Engineering degree. This project aimed to understand the impact of gamification in the way students learn. The action research methodological approach was configured as a practice, but also as an investigative activity that drove the process of change. The main propose of this paper is to reflect about the ethical challenges that teacher/researcher has to face during the action-research process.

The researcher, with the support of a consultant supervisor, created and designed the pedagogical experiences, the student evaluation process and the research assessment. There was a transitional relationship between what was investigated and who was investigating that allowed rethinking the educational context. The researcher/teacher documented all the process. It was a procedure that involved reflexivity and questioning. However, in this study, the researcher was both inside and outside of the process. He assumed the role of the researcher, leading the project, collecting the voice of students and of his own, analyzing data, interpreting and reflecting. But he was also a teacher who supported the students, inquiring them about the learning process, leading them to understand their beliefs about what learning is and motivating them to believe in a different approach of learning.

Recognizing himself also as practitioner, advancing and retreating in his understanding about pedagogy, about learning through games and trying to understand the accuracy of his actions.
