

NEST Project

Co-Creating a New Form of Governance in Societal Transition for Healthy Living

Portuguese Local SIEHL - Vilares da Vilarça SIEHL - Social Innovation Ecosystems for Healthy Living

Our vision:

- Health for all in a well-being economy
- Societal systems should be more integrated, and actively crossing borders between existing silos through transition and mission-driven innovation thinking and doing.
- All knowledge holders with voice and action on the table, based on integrated working, learning, research and innovation;
- To create an impact orientated learning process.

Methodology:

- To develop co-creation projects aiming to reinforce iLocal projects and activities, through a bottom-up approach, such as:
- Workshop “Unlocking the Potential of Social Entrepreneurship: A Comprehensive Exploration.”
- Co-creation Project – “Who are our grandparents' cousins?”
- Co-creation Project – “Health Basket... eat local, eat better.”
